Response to Amendment

Applicant amendment received on December 14, 2009 has been fully considered and entered, but the arguments are not deemed to be persuasive.

REMARKS:

The Terminal Disclaimer received on December 14, 2009 has not been accepted by the office for the following reasons.

The Terminal Disclaimer verification branch did not approve the Terminal Disclaimer because it is not proper. Applicant's Terminal Disclaimer is not approved because the application serial number 10/562,675 as cited by the Examiner in the last office action is not a publication no. It appears that the number noted by the attorney of record lists only a publication no.

While it appears that the applicant provided both, the serial number and the publication no, the Office is requesting a correction in order to proceed.

Since the Terminal Disclaimer has not been approved, the Examiner is resubmitting the old office action pending the applicant's response.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 2621

unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent Application Publication no. 2006/0160436 A1 to Oka et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the present patent application are somewhat similar to the cited Patent Application Publication no.

Therefore, it is considered obvious that one skilled in the art at the time of the invention would recognize the advantage of modifying the method and system for evaluating moving image quality of a screen of the present Patent Application publication by incorporating Oka’s teachings as shown in US Patent Application publication 2006/0160436 A1 for the same purpose of measuring a screen motion image quality without electric synchronism as taught by Oka (See [0007]).

Claims 2-11 are rejected by dependency to claim 1.

NOTE: The Applicant is urged to indicate all the co-pending Patent Applications as well as published Patents similar to the claims of the present application in order to expedite while avoiding delays of Terminal Disclaimers.
